## PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with proven expertise in full-stack web and mobile application development. Specialized in React.js, Next.js, React Native, and modern backend technologies including Node.js, Express.js, Supabase, and Firebase. Successfully delivered multiple real-world client projects featuring authentication systems, role-based access control, RESTful APIs, and AI-powered functionalities. Enhanced skills through Frontend Masters certifications in Next.js Fundamentals v4 and Web Security. Seeking an internship or junior developer position to leverage technical expertise and contribute to innovative software development projects while growing as a professional developer.

## EDUCATION

### Bachelor of Science in Computer Science (BSCS)

COMSATS University Islamabad, Attock Campus | Jan 2022 - Jan 2026

- Relevant Coursework: Mobile Application Development, Web Technologies, Database Systems, Machine Learning, Software Engineering, Design and Analysis of Algorithms, DevOps for Cloud Computing, Computer Networks, Information Security

## CERTIFICATIONS

- **Next.js Fundamentals v4** - Frontend Masters (2026)
- **Web Security** - Frontend Masters (2026)
- **AI Agents fundamentals v2** – Frontend Masters (2026)

## TECHNICAL SKILLS

**Frontend Development:** React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind CSS, Responsive Design

**Backend Development:** Node.js, Express.js, RESTful APIs, MongoDB, Firebase, Supabase

**Mobile Development:** React Native, Expo, Cross-platform App Development

**Tools & Technologies:** Git, GitHub, Version Control, Web Security Best Practices, AI/ML Integration

**Additional Skills:** Authentication Systems, Role-Based Access Control, Database Design, API Integration, Problem Solving

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer - Freelance & Personal Projects

Self-Employed | Jan 2024 - Present

- Developed and deployed 3+ production-ready web and mobile applications using React.js, Next.js, and React Native, serving real clients and end-users
- Architected and implemented complete authentication systems with role-based access control (RBAC) for User, Staff, and Admin roles
- Designed and integrated RESTful APIs using Node.js and Express.js for seamless frontend-backend communication
- Implemented secure backend services using Firebase Authentication and Supabase for data storage, user management, and real-time updates
- Built responsive, cross-platform compatible UI components ensuring optimal user experience across devices
- Integrated AI/ML models for intelligent features including image classification and automated content generation
- Utilized Git and GitHub for version control, code collaboration, and project deployment workflows

- Applied web security best practices including input validation, XSS prevention, CSRF protection, and secure authentication flows

## KEY PROJECTS

### Fixora - AI-Powered Mobile Issue Reporting Application | Final Year Project

*Tech Stack: React Native, Expo, Supabase, Machine Learning, GPS Integration*

- Engineered a cross-platform mobile application for community issue reporting with AI-powered categorization and tracking
- Implemented three-tier role-based authentication system (User, Staff, Admin) with secure login and registration flows
- Integrated Supabase backend for real-time data synchronization, user management, and secure cloud storage
- Developed and deployed custom machine learning model for automated image classification and issue categorization
- Built GPS-based location tracking system for accurate issue reporting and geographic visualization
- Designed intuitive UI/UX with React Native components ensuring smooth user experience across iOS and Android platforms

### Rescov - AI-Powered Resume & Cover Letter Builder

*Tech Stack: Next.js, TypeScript, Google Gemini AI, Real-time Preview*

- Built an intelligent resume and cover letter generation platform with real-time AI-powered suggestions and previews
- Integrated Google Gemini AI model for smart content generation and professional formatting recommendations
- Implemented live preview functionality with multiple professional templates and customization options
- Developed structured data handling system for resume sections ensuring ATS-friendly output formats

### KAMI Mobile Shop - Full-Stack E-Commerce Platform | Client Project

*Tech Stack: Next.js, TypeScript, Supabase, Admin Dashboard*

- Delivered a complete e-commerce solution for mobile device sales with real-time inventory management
- Built comprehensive admin panel featuring product management, order processing, and customer analytics dashboard
- Implemented real-time order tracking system with automated status updates and email notifications
- Integrated printing services functionality for generating invoices and order receipts
- Designed secure checkout process with order verification and customer data protection

### AI Agent – Intelligent CLI task runner

*Tech Stack: TypeScript, Node.js, Vercel AI SDK, Google Gemini API, Zod, Tavily API, Git*

- *Architected an autonomous AI Agent utilizing the Vercel AI SDK to manage dynamic, multi-step agentic execution loops capable of self-correction and reasoning through setbacks.*
- *Engineered strict, type-safe custom system tools using TypeScript and Zod schemas, enabling the LLM to execute secure file system operations based on natural language intent.*
- *Refactored the agent's web research infrastructure by integrating the Tavily API, ensuring resilient, real-time data retrieval with structured source citations while bypassing layout-based breaking changes.*
- *Optimized runtime execution logs to separate internal tool telemetry from final outputs, delivering beautifully formatted, production-ready markdown responses in the terminal.*
- *Implemented advanced prompt engineering and orchestration patterns to bridge abstract natural language commands with deterministic, production-grade software execution.*

## ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Urdu (Native), Punjabi (Native)
- **Availability:** Immediate availability for internship and junior developer opportunities
- **Work Authorization:** Pakistani national, open to remote and on-site positions
